Most Practices Don't Have a Staffing Problem. - They Have a Planning Problem.

Every week, Practice Managers are asking:

- Do I have enough staff tomorrow?
- Why is reception overwhelmed on some days and quiet on others?
- Do I need another nurse during peak periods?
- Are we overstaffed or understaffed?
- Why does the roster constantly change?

Most Practices answer these questions using spreadsheets, habit, and experience.

Medari gives you visibility before problems happen.

Meet Medari

The Workforce Planning Platform for Healthcare

Medari connects directly with your Practice management system to understand how your Practice actually operates.

By analysing historical activity, appointment demand, workforce availability, and operational capacity, Medari helps you make smarter workforce decisions.

X No spreadsheets. X No guesswork. X No reactive staffing. X Just better planning.

What Medari Helps You Do

Demand Forecasting Understand expected demand by day, week, and month. Identify peak periods before they happen and ensure your workforce is prepared.	Intelligent Workforce Planning Generate workforce recommendations based on operational demand, staff availability, and workforce capacity. Build schedules in minutes instead of hours.
Best Practice Integration Connected directly to Best Practice Software. No double handling. No manual exports. No duplicate data entry.	Workforce Visibility See workforce coverage across your organisation in real time. Identify: • Understaffing risks • Overstaffing opportunities • Coverage gaps • Capacity constraints Before they impact operations.
Fair Team Allocation Balance workloads while considering: • Availability • Preferred working days • Target hours • Maximum hours • Skill requirements Create fairer and more sustainable workforce plans.	Faster Response to Change When staff become unavailable or demand changes unexpectedly, Medari helps identify the best coverage options immediately. Reduce disruption. Maintain continuity. Keep operations moving.

Why Healthcare Teams Choose Medari	
Traditional Workforce Systems • Manual scheduling • Limited operational visibility • Reactive staffing decisions • Built for generic industries • No healthcare context	Medari • Demand-driven planning • Workforce visibility • Operational insights • Built for healthcare • Best Practice integration

HOW IT WORKS

From Practice data to optimised roster & automate

Step 1 Connect your Practice Securely connect Medari to Best Practice.	Step 2 Analyse demand Medari identifies operational patterns and workforce requirements.	Step 3 Plan with confidence Generate workforce recommendations and optimise coverage.	Step 4 Improve continuously Monitor workforce utilisation and operational performance over time.
---	---	--	---

ROI – MAKE IT MAKE SENSE

✓ 5+ hours per week in workforce planning ✓ Reduced overstaffing and understaffing ✓ Faster response to sick leave and coverage gaps ✓ Better utilisation of existing staff	Example Let's say a Practice has: • 5 GPs • 3 nurses • 5 admin/reception 13 team members. If Medari helps them: • save 3 hours/week of PM time • remove 5 unnecessary staffing hours/week • improve coverage during peak demand The value is easily: \$10,000–\$30,000+ per year.
The Bottom Line Medari isn't just about creating rosters. It's about helping Practices make better workforce decisions with the team they already have
